

## Brexit Preparation

26<sup>th</sup> November 2020

At Shropshire Stainless & Aluminium Ltd we have been working tirelessly over the last number of months and years to ensure there is minimal disruption to both our customers and supply chain with the upcoming Brexit date of 1<sup>st</sup> January 2021.

We have bolstered our stocks to ensure that there is minimal disruption to our customer base and continue to encourage our customer base to have open discussions with ourselves on how we can assist with your material needs to ensure you are not affected and mitigate any potential supply chain risks you may feel are there.

As a company we remain as strong as ever with vast production capacity boasting 8 CNC Plate Saws and 8 CNC Bar saws, with continuous investment happening throughout the group to ensure we keep our lead times to a minimum.

We also continue to invest in our own transport fleet with 15 vehicles ranging from 26T – 3.5T, as well as having strong partnerships with local, national and international haulage and courier services. SSA Ltd strongly believe this puts us in an advantageous position to ensure minimal disruption to the supply of goods.

Whilst there is still some deliberation over the North and South Irish border and trade agreement, we are keeping a close eye on any developments and will take appropriate actions to ensure we can continue to serve the entire island of Ireland with minimal disruption.
